About me

In autumn 2016 I moved to Helsinki to study Information and Communication Technology (Bachelor of Engineering) in Metropolia UAS. In school I found my major, Biomedical/Medical Engineering, which gives my work a more meaningful goal. My studies and hobbies gave me a strong foundation in IT and project working, and I'm always analytical and thorough. I study full-time, so my employment options are summertime, evenings or weekends. My strong background in IT allows me to work in other places of employment rather just strictly working in something related to Medical engineering.

Education

Metropolia University of Applied Sciences autumn, 2016 -

Information and Communication technology, Bachelor of Engineering
Biomedical/Medical Engineering

Nivalan Ammattiopisto & Nivalan lukio, 2011 - 2015
